SUMMARY ACCOMPLISHMENT REPORT

Name of Student : Esmena, Alyzza Marizz
Subject/Section : BSIS 41-A
Company : ACLC Northbay Campus

Period : (Prelim / Midterm / Final)
Duration : 137 HOURS

Week No.	Activities	Duration
Week 1	Throughout my On-the-Job Training, I was first welcomed and oriented by Ms. Ems, School Director, who introduced us to the faculty and staff, particularly the personnel assigned to the Admission, Registrar, and Cashier offices, to help us familiarize ourselves with the workplace. Ms. Kurtnie, Assistant Registrar, then guided us thoroughly on our core responsibilities. She first oriented us on the contents of student folders, including credentials such as TOR, birth certificates, Form 137, and Form 138. Finally, she trained us on proper record organization and encoding procedures using Excel and Google Sheets	29 HOURS
Week 2	During the second week, I systematically arranged student records by year, course, and alphabetical order to maintain an organized filing system. I verified and encoded student files, including older records dating back to 1996. Additionally, I separated and categorized various administrative documents. To conclude the week, I organized Certificates of Enrollment before systematically encoding them into the system.	21 HOURS

Week 3	In the third week, coinciding with the Senior High School examination period, I was assigned together with my co-trainees to distribute exam permits and guide students. We also assisted students and parents with various inquiries, including procedures for obtaining Form 137, securing school IDs, and settling tuition payments. To ensure smooth operations, we directed them to the appropriate administrative offices as needed. Through these tasks, we provided continuous guidance and support throughout the exam period.	24 HOURS
Week 4	By the fourth week, following the distribution tasks, I was trained by my co-trainee Ali on document scanning, a process she had learned from Ma'am Mitch. I learned to operate the scanner and digitize important documents such as TOR, birth certificates, Good Moral Certificates, and Form 138. Simultaneously, I encoded the corresponding details into the system. To maintain efficiency, we took turns performing tasks, alternating between scanning, encoding, and preparing documents by removing staples and arranging papers to support one another throughout the workflow.	34 HOURS
Week 5	During the fifth week, Ms. Kurtnie assigned us a new encoding project in Google Sheets. This task focused specifically on TOR and Diploma records of former college students covering the years 1996 to 2017. I entered the records systematically across the assigned range of years. Throughout the process, I ensured strict accuracy, consistency, and completeness across all entries.	29 HOURS

Total Hours: 137 HOURS # Hour / # Minutes
